

What is claimed is:

1. An absorbent article comprising

A. a silhouette comprising

- (i) a first end,
- (ii) a second end, wherein the second end being in opposite relation to the first end, and
- (iii) a first longitudinally extending edge opposed to a second longitudinally extending edge, the first and second longitudinally extending edges connecting the first end and the second end;

B. a layered portion comprising

- (i) a body-facing layer and
- (ii) a garment-facing layer, wherein the absorbent article is drapeable.

2. An absorbent article of claim 1, wherein the body-facing layer comprises at least two layers.

3. An absorbent article of claim 2, wherein the first layer forms a body facing surface and the second layer is absorbent.

4. An absorbent article of claim 3, wherein the first layer comprises a spunlace material including from about 10 to about 65 wt % rayon and from about 35 to about 90 wt% polyester.

5. An absorbent article of claim 1, wherein the body-facing layer is absorbent.

6. An absorbent article of claim 1, further comprising an absorbent layer.

7. An absorbent article of claim 1, further comprising a transfer layer.
8. An absorbent article of claim 1, wherein the body-facing layer comprises, polyethylene, polyester, cellulose, and mixtures thereof.
9. An absorbent article of claim 1, wherein the article is selected from the group consisting of a pantiliner, a sanitary napkin and an incontinence device.
10. An absorbent article of claim 1, further comprising at least one wing extending from the first longitudinal edge or the second longitudinal edge.
11. An absorbent article of claim 1, wherein the silhouette is shaped to fit within the crotch of a thong.
12. An absorbent article of claim 11, further comprising at least one wing extending from the first longitudinal edge or the second longitudinal edge.
13. An article of claim 1, wherein at least one layer further comprises a color selected from the group consisting of white, black, red, yellow, blue, orange, green, indigo, violet, and mixtures thereof.
14. An article of claim 13, wherein the color is black.
15. An absorbent article comprising
- A. a silhouette comprising
- (i) a first end,
- (ii) a second end, wherein the second end being in opposite relation to the first end, and
- (iii) a first longitudinally extending edge opposed to a second longitudinally extending edge, the first and second

longitudinally extending edges connecting the first end and the second end;

B. a layered portion comprising

- (i) a body-facing layer comprising about 75% polyester and about 25% rayon and
- (ii) a garment-facing layer comprising microporous polyethylene, wherein the absorbent article is drapeable.

16. An absorbent article of claim 15, further comprising a transfer layer.

17. An absorbent article of claim 15, further comprising at least one wing extending from the first longitudinal edge or the second longitudinal edge.

18. An absorbent article comprising

A. a silhouette comprising

- (i) a first end,
- (ii) a second end, wherein the second end being in opposite relation to the first end, and
- (iii) a first longitudinally extending edge opposed to a second longitudinally extending edge, the first and second longitudinally extending edges connecting the first end and the second end;

B. a layered portion comprising

- (i) a body-facing layer comprising about 75% polyester and about 25% rayon;
- (ii) an absorbent layer comprising at least three layers, wherein the first layer comprises polyester and polyethylene, the

second layer comprises polyester, polyethylene, and rayon,
and the third layer comprises polyester, polyethylene, and
rayon;

- (iii) a garment-facing layer comprising microporous polyethylene,
wherein the absorbent article is drapeable.

19. An absorbent article of claim 18, further comprising a transfer layer.

20. An absorbent article of claim 18, further comprising at least one wing extending
from the first longitudinal edge or the second longitudinal edge.

21. An absorbent article comprising

A. a silhouette comprising

- (i) a first end,
(ii) a second end, wherein the second end being in opposite
relation to the first end, and
(iii) a first longitudinally extending edge opposed to a second
longitudinally extending edge, the first and second
longitudinally extending edges connecting the first end and
the second end;

B. a layered portion comprising

- (i) a body-facing layer comprising about 35 % polyester and
about 65% rayon;
(ii) an absorbent layer comprising at least three layers, wherein
the first layer comprises polyester and polyethylene, the
second layer comprises polyester, polyethylene, and rayon,
and the third layer comprises polyester, polyethylene, and
rayon;

- (iii) a garment-facing layer comprising microporous polyethylene,
wherein the absorbent article is drapeable.

22. An absorbent article of claim 21, further comprising a transfer layer.

23. An absorbent article of claim 21, further comprising at least one wing extending
from the first longitudinal edge or the second longitudinal edge.
